

Our Lady Star of the Sea

We are growing in God's love... achieving our dreams

Teams – Let's get started!

Firstly, use the login details provided by your child's class teacher to create an account.

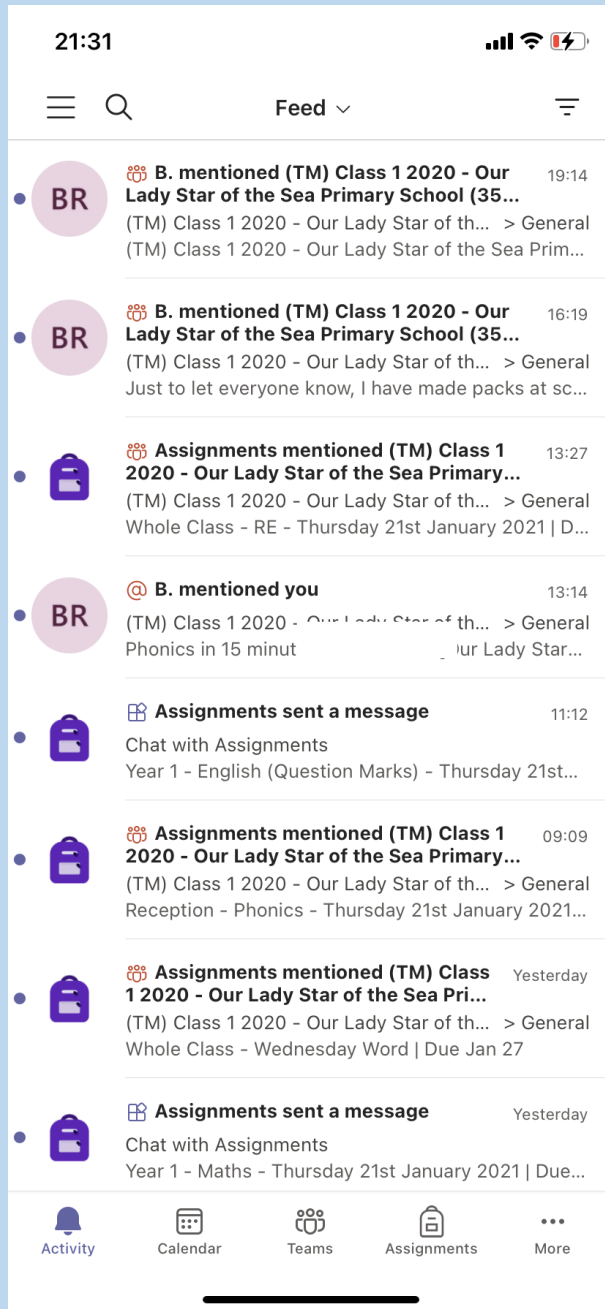

You must input the details accurately (watch the full-stops!)

You will then be presented with this. Download the App by clicking 'Download the app'. Once you have, input details and login to the app!

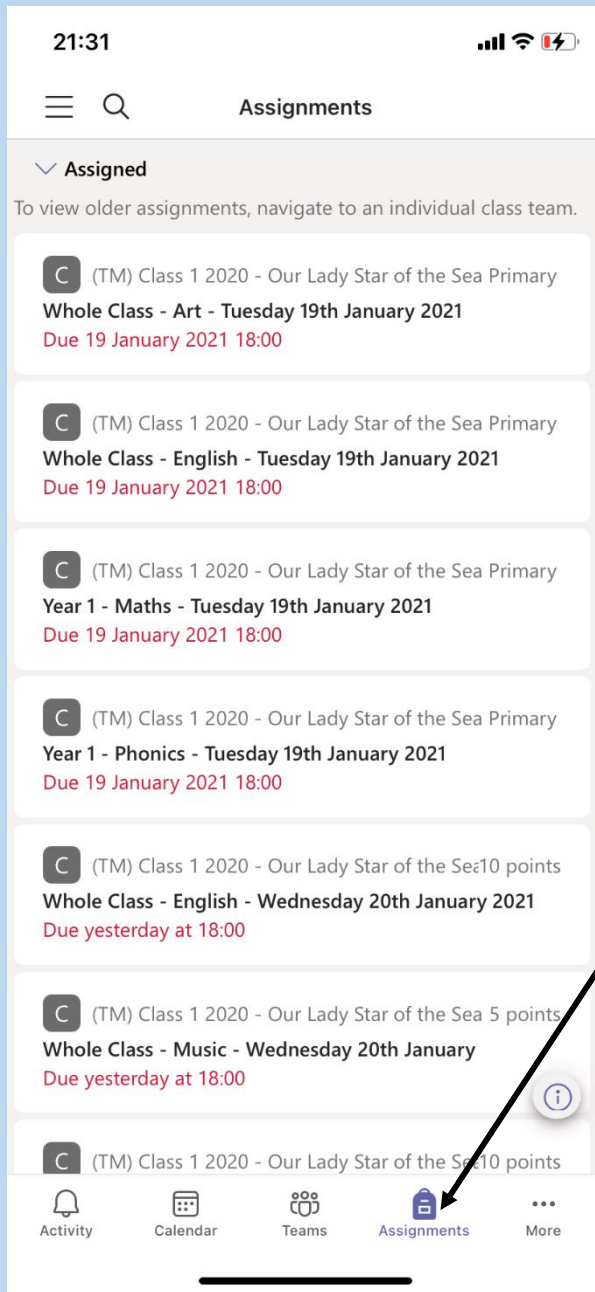

If storage is a problem – delete Class Dojo as tasks will no longer be provided using this.

Messaging teachers can be done via their email on request or by visiting our Facebook page. We are also working on getting the chat option up and running on Teams!

Once you have logged into the app, this is the screen you will see. It has all of the most recent activity of the day.

You will see different messages and assignments presented here.

By clicking on the 'Assignments' button at the bottom of the page, you will be presented with all the work set for you child by their class teacher!

Instructions

Lesson 2 - Mark Making

Today, we are going to create patterns using repetition.

Have a look through the teaching slides and see what you notice about the different lines used. We can apply different amounts of pressure when drawing to change the way our lines look. Have a go at trying this out!

Then, I would like you to create your very own piece of artwork using different patterns. There is an example on page 8 to help you. I have also uploaded some pattern ideas if you're struggling to think of some!

I can't wait to see your wonderful artwork. You could even use different coloured pencils to make it look more interesting!

More

Once you have completed a task and are ready to upload, click 'Add Work'.

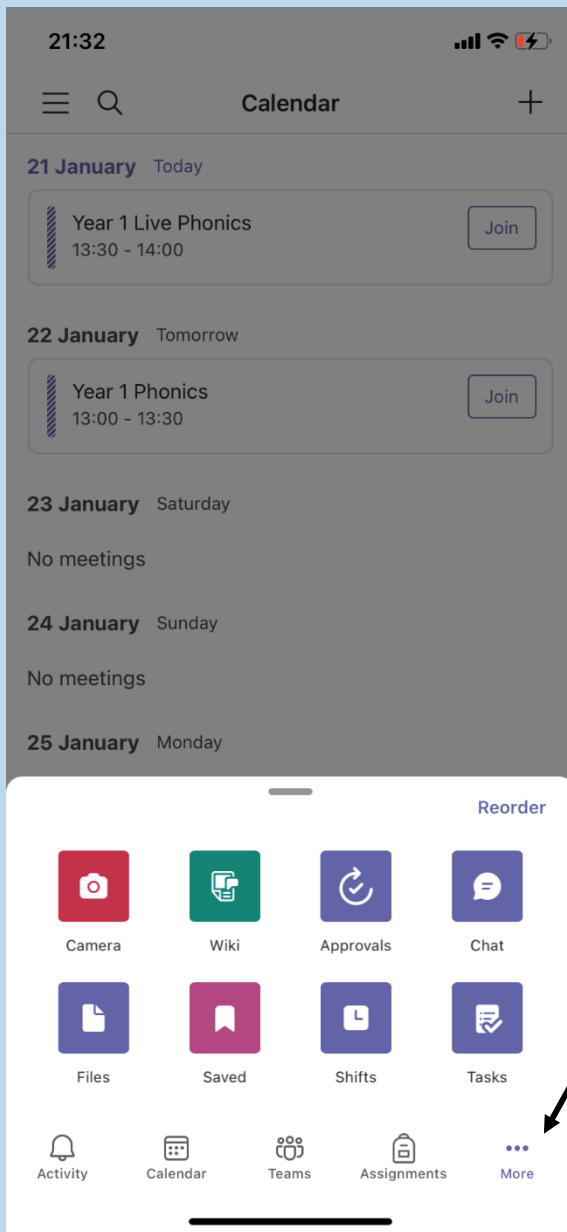

You then click on 'Upload from this device' and are then given the option to take a photo or video, upload a photo from your library or browse for a file. It is probably easier to just take the photo and then upload it there and then! Once you are happy with the photo, click 'use photo' and it's done!

At the bottom of the page, there is an option for 'calendar'. This is where the information about live teaching sessions is stored. You can check here and should get a notification when your child has been scheduled for a live lesson.

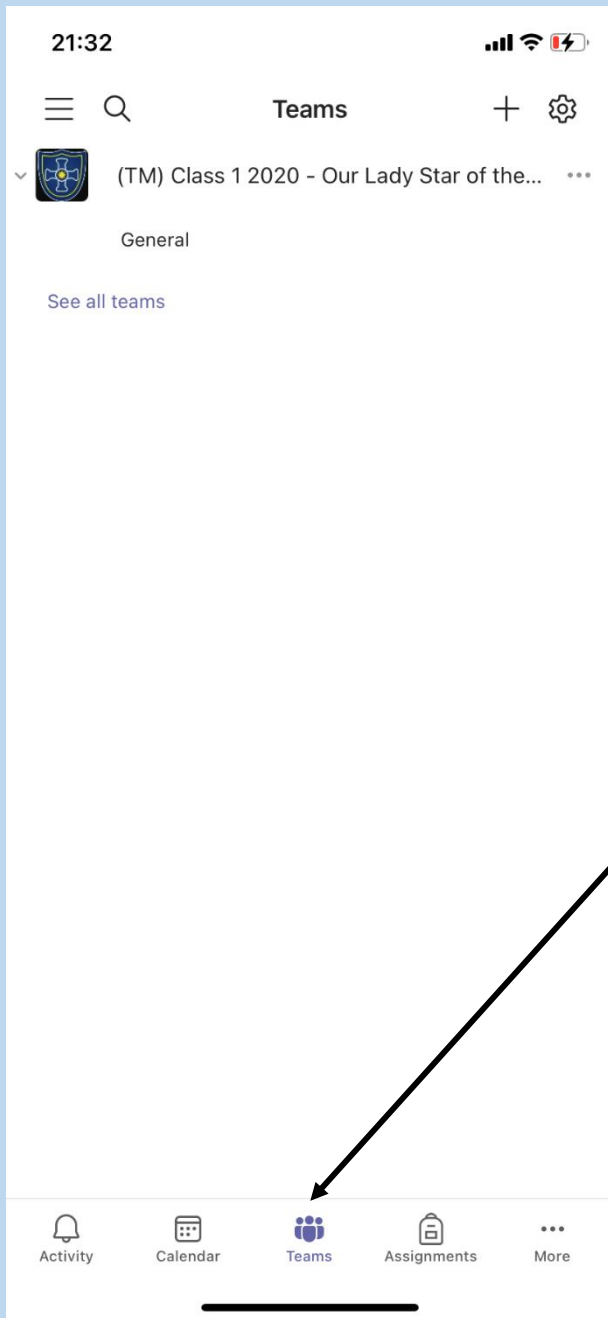

The three dots at the bottom of the page open up more options for you to explore!

E.g.

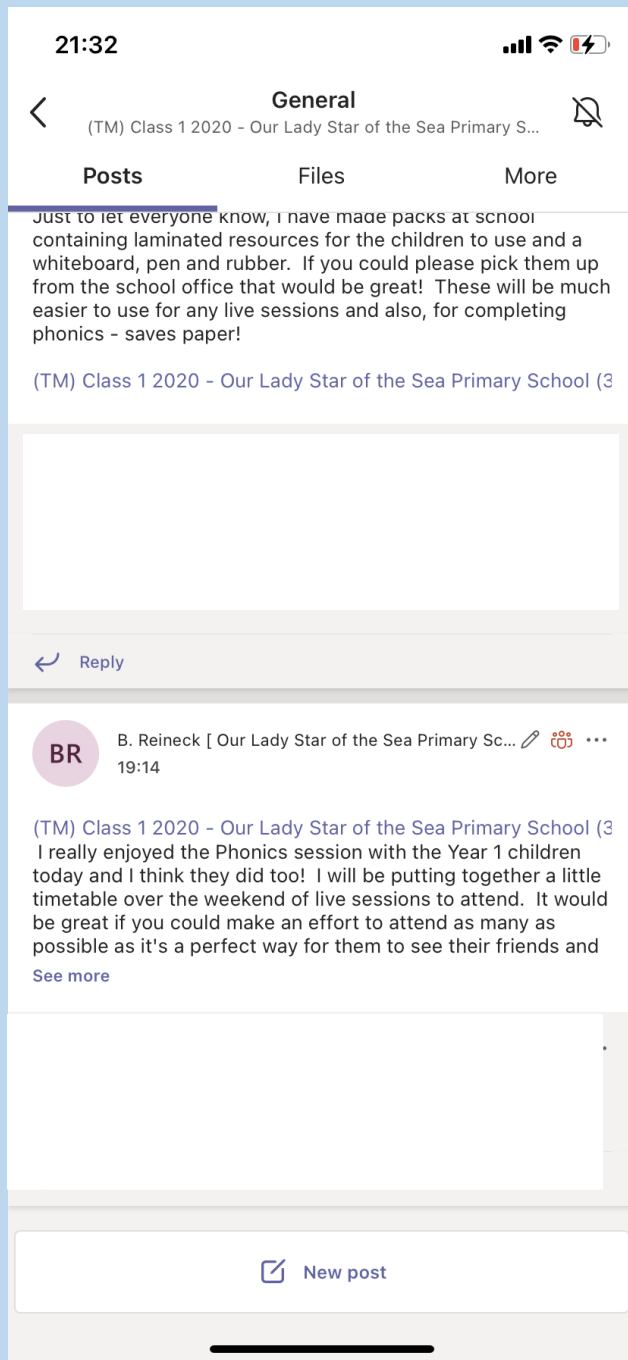

Files - sometimes work may be stored in here.

Chat – when this option is ready to use we will let you know!

When you click on the icon for 'Teams' at the bottom of the page, this appears.

Click on 'General'.

You will then see this page which is a little like a Facebook feed.

Posts can be written by the class teacher and liked or commented on!

Whole class tasks will appear here and any reminders that teacher's may tag children in!

We hope this helps! If you need any further guidance, do not hesitate to ask!

We thank you for your continued support!
