

In Science this term, we will be learning all about Animals, including Humans. The children will explore the five key food groups and learn how a balanced diet helps us to stay healthy. We will also investigate the human body, focusing on the skeleton and muscles, and discovering how they work together to support movement and protect our organs. This exciting topic will help the children build their understanding of how living things grow, move, and stay strong.

P.E. will take place for **Class 3 on a Tuesday and a Thursday**. Children will need to attend school on these days in their PE kit. Please ensure that children have appropriate clothing to take part in PE lessons in different weather, especially as it starts to become colder at this time of year. Our topics this term are rugby and tennis.

We have Easington Sports Partnership paying us a visit each Thursday to work with Class Three, teaching them valuable skills when playing rugby.

Autumn Term 2025-2026

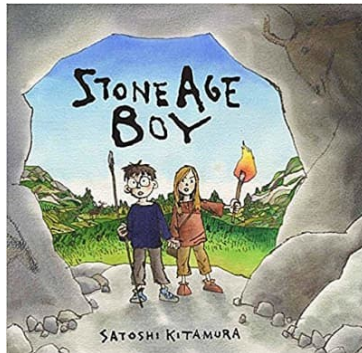

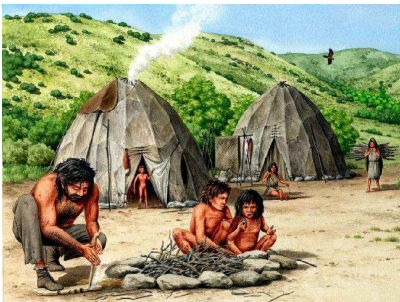

Dear Parents / Carers,

We hope you all had a fantastic summer break filled with special moments and quality time with your children. As we step into the autumn term, we're excited to explore a wide range of subjects and learning opportunities with the children. We're confident they'll enjoy the journey ahead and we look forward to seeing their curiosity and enthusiasm blossom.

As we know, the British weather can be rather unpredictable—sunshine one moment, showers the next! Please ensure your child comes to school with appropriate clothing and footwear to keep them comfortable and dry throughout the day. A waterproof coat and sturdy shoes are especially helpful.

We place great importance on supporting healthy habits. If your child would like to bring a healthy snack to school, they are more than welcome to do so. We also provide a selection of nutritious snacks in school to keep them energised and focused.

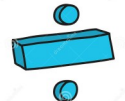

We are going to use a variety of stories in class this term to get as much exposure to exciting vocabulary that we can use in our writing. To start, we will be reading 'Stone Age Boy'. A fascinating story about a boy who accidentally finds himself in the Stone Age! This coincides with our History topic, Stone, Bronze and Iron Age. The children will learn about prehistoric times and delve into the lives of Neanderthals. After that, we will be moving onto our Geography topic 'Journey of the River'. Locating different rivers, in particular the Tyne, Wear and Tees.

In Maths, we will be looking at Place Value, before moving onto addition and subtraction. This will include looking at formal written methods (column method) and practicing our mental addition and subtraction. We will then move onto multiplication and division, including multiplication and division facts.

Thousands	Hundreds	Tens	Ones
5	6	2	1

Through our collective worship, we continue to celebrate key events across the liturgical year. These Celebrations of the Word will take place in class during the week.

Towards the end of this term, we will also begin our preparations for Advent as we ready ourselves to reflect on the coming of Jesus into the world.

Please do not hesitate to speak to me at the end of the school day if you have any queries or concerns. With so many exciting things going on, do not forget to keep checking our school Facebook page to see what is happening in school.

Many thanks,

Miss Cribbin
